RAKSHAN CHINTALA

Hyderabad, India | Full Stack Developer | rakshanch0004@gmail.com | phone | Portfolio | LinkedIn | GitHub

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, Python, TypeScript, HTML5, CSS3, SQL
Frameworks and Libraries: Spring Boot, React.js, Next.js, Express.js, FastAPI, Spring Security, JPA, React Native
Database Technologies: MySQL, MongoDB, PostgreSQL, Redis
Tools and Platforms: Git, Docker, AWS (EC2, S3), Maven, Postman, Vercel, Selenium, BeautifulSoup

PROFESSIONAL EXPERIENCE

Full Stack Developer June 2025 - Dec 2025
Qontact – Toronto, Canada

- Developed responsive web application from Figma designs using Next.js 15, implementing pixel-perfect UI components with optimized performance and enhanced user experience across multiple devices and browsers
- Engineered automated web scraping system using FastAPI, Selenium, and BeautifulSoup to extract data from multiple websites, transforming unstructured data into structured JSON formats and reducing manual data entry time by 80%
- Built production-ready REST APIs with FastAPI adhering to RESTful principles, ensuring high reliability, scalability, and performance for various business requirements and workflows
- Designed and implemented data transformation pipelines to convert scraped data into structured JSON schemas, maintaining data consistency and enabling seamless integration with downstream applications
- Developed cross-platform mobile application using React Native with reusable components and native modules, delivering consistent user experience across iOS and Android platforms while maintaining code efficiency
- Collaborated with cross-functional teams in agile environment to deliver features on schedule, participating in code reviews and technical discussions to maintain high code quality standards

Full Stack Developer Dec 2025 - Jan 2026
Pluto-Rides – Bengaluru, India

- Architected and developed cross-platform mobile applications using Kotlin Multiplatform (KMP) and Compose Multiplatform (CMP), delivering consistent user experience across iOS and Android with shared business logic and native UI performance
- Engineered scalable serverless backend infrastructure on AWS, implementing 20+ RESTful API endpoints using Lambda functions and API Gateway, ensuring high availability
- Designed and optimized PostgreSQL database schemas using pgAdmin, implementing efficient data models for real-time ride matching, driver tracking, and transaction management with optimized query performance
- Contributed to development of customer and driver mobile applications, implementing real-time location tracking, payment integration, and push notifications to enhance user engagement and operational efficiency
- Independently architected and delivered complete admin application from ground up, building comprehensive dashboard for ride management, driver verification, analytics, and system monitoring to streamline business operations
- Implemented robust authentication and authorization mechanisms across all three applications, ensuring secure data handling and role-based access control for customers, drivers, and administrators

EDUCATION

Vellore Institute of Technology (VIT-AP) March 2020 - May 2024
Bachelor of Technology in Electronics and Communication Engineering
GPA: 7.8/10.0

FIITJEE College June 2018 - May 2020
Intermediate (XII)
GPA: 9.0/10.0

Secondary Education (X) June 2017 - May 2018
GPA: 9.5/10.0

CERTIFICATIONS

- Data Structures and Algorithms with Java - APNA College
- Spring Boot 3 and Spring Framework 6 with Java - Udemy
- Career Essentials in Software Development - Microsoft and LinkedIn Learning
