

RAKSHAN CHINTALA

Software Engineer | Full Stack & Cloud Development | AI-Powered Systems
Hyderabad, India | rakshanch0004@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Results-driven Software Engineer with hands-on experience designing and delivering full-stack web applications, cloud-native REST APIs, and AI-powered solutions. Proven ability to take ownership of complex software projects from conception to deployment, working in Agile/Scrum environments. Experienced with AWS services (Lambda, S3, EC2), generative AI integrations (RAG pipelines, LLM APIs), and cross-functional collaboration with product and business stakeholders. Passionate about building scalable, high-quality software with a focus on clean architecture and continuous improvement.

TECHNICAL SKILLS

Languages	Java, JavaScript, TypeScript, Python, SQL, HTML5, CSS3
Frameworks	Spring Boot, React.js, Next.js, Express.js, FastAPI, Node.js, KMP, CMP
Cloud & DevOps	AWS (EC2, S3, Lambda, API Gateway), Docker, Vercel, Maven, Git
Databases	MySQL, PostgreSQL, MongoDB, Redis, Pinecone (Vector DB), Redshift
AI & Integration	Claude API, OpenAI API, LangChain, RAG Pipelines, n8n
Methodologies	Agile, Scrum, Design Thinking, REST API Design, Code Reviews, CI/CD
Tools	Postman, Selenium, BeautifulSoup, Firebase (FCM), pgAdmin

PROFESSIONAL EXPERIENCE

Software Engineer | **Pluto-Rides** | Bengaluru, India

Jan 2026 – Mar 2026

- Owned end-to-end delivery of a full-featured admin panel from scratch, covering ride management, driver verification, analytics, and system monitoring — taking ownership from conception to deployment within tight timelines
- Architected and built serverless backend APIs on AWS using Lambda and API Gateway, contributing multiple RESTful endpoints for ride and driver management, improving backend scalability with zero-server overhead
- Designed PostgreSQL database schemas using pgAdmin for ride matching, driver tracking, and transaction management, ensuring reliable and consistent data flow across services
- Implemented real-time location tracking and Firebase Cloud Messaging (FCM) push notifications for customer and driver mobile apps, directly improving user engagement
- Developed cross-platform mobile applications using Kotlin Multiplatform (KMP) and Compose Multiplatform (CMP), sharing business logic and UI components across iOS and Android
- Built and maintained authentication and authorization flows with role-based access control across customer, driver, and administrator roles, ensuring secure data handling
- Collaborated closely with product and business teams in an Agile environment, delivering features iteratively while managing scope, risk, and timelines effectively

Software Engineer | **Qontact** | Toronto, Canada (Remote)

Jun 2025 – Dec 2025

- Integrated a RAG-based AI chatbot into a Next.js application using LLM APIs (Claude/OpenAI) and Pinecone as the vector database, enabling context-aware, generative AI responses from indexed data sources
- Designed and developed REST APIs using FastAPI to handle various business workflows, ensuring reliable and consistent data flow between frontend and backend systems
- Built an automated web scraping system using FastAPI, Selenium, and BeautifulSoup to extract and convert data from multiple websites into structured JSON formats, reducing manual data entry time by 80%
- Constructed data transformation pipelines to convert scraped data into structured JSON schemas for seamless downstream application integration

- ▶ Developed a responsive web application from scratch using Next.js 15 based on Figma designs, delivering consistent performance across devices and browsers
- ▶ Participated in regular code reviews and cross-functional discussions to maintain code quality, uphold best practices, and deliver features on schedule

EDUCATION

Vellore Institute of Technology (VIT-AP)

Mar 2020 – May 2024

B.Tech – Electronics and Communication Engineering | **CGPA: 7.8/10.0**

FIITJEE College

Jun 2018 – May 2020

Intermediate (XII) | **CGPA: 9.0/10.0**

Secondary Education

Jun 2017 – May 2018

Class X | **CGPA: 9.5/10.0**

CERTIFICATIONS

- ▶ Data Structures and Algorithms with Java – APNA College
- ▶ Spring Boot 3 and Spring Framework 6 with Java – Udemy
- ▶ Career Essentials in Software Development – Microsoft & LinkedIn Learning

PROJECTS

Modular AI Agent | [Python](#), [Phidata](#), [OpenAI](#), [Groq](#), [Docker](#), [Pandas](#)

Personal Project

- ▶ Built a fully modular, production-ready AI agent using the Phidata framework, supporting dynamic tool integration, internal API connectivity, and multi-model AI support (OpenAI, Groq)
- ▶ Designed a scalable, plug-and-play architecture allowing seamless addition or replacement of tools, data sources, and AI models — enabling the agent to adapt to diverse business use cases without code rewrites
- ▶ Integrated relational and NoSQL database connectivity for real-time querying and data retrieval, with Pandas-powered data manipulation for structured analysis and predictions
- ▶ Implemented NLP-driven query handling and intelligent automation workflows, enabling the agent to process natural language inputs and return context-aware responses from connected data sources

Social Media REST API | [Java 17](#), [Spring Boot](#), [Spring Security](#), [MySQL](#), [JPA](#), [Maven](#)

Personal Project

- ▶ Built a production-grade RESTful backend API for a social media platform using Java Spring Boot 3, supporting full CRUD operations on users and posts with a MySQL database via JPA
- ▶ Secured all API endpoints using Spring Security with basic authentication and custom error handling for resource-not-found and validation exceptions
- ▶ Designed a clean REST API with 9 endpoints across user and post resources following REST conventions, tested thoroughly using Postman
- ▶ Applied input validation using Java annotations and Jackson for JSON serialization, ensuring reliable and consistent data flow between client and server
