

RAKSHAN CHINTALA

Software Engineer | Full Stack & Cloud | AI-Powered Systems

+91 9581812357 | rakshanch0004@gmail.com | Hyderabad, India | linkedin.com/in/rakshan-chintala-08965521a | github.com/Rakshan0004 | rakshan-3-d-portfolio.vercel.app

PROFESSIONAL SUMMARY

Results-driven Software Engineer with 1.5+ years of hands-on experience building full-stack web applications, cloud-native REST APIs, and AI-powered systems. Shipped production features serving real users across ride-hailing and B2B SaaS domains. Skilled in AWS serverless architecture (Lambda, API Gateway), RAG pipeline engineering, and LLM API integrations. Thrives in Agile startup environments, consistently taking ownership from conception to production deployment.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python, SQL, HTML5, CSS3

Frameworks: Spring Boot, React.js, Next.js, FastAPI, Express.js, Node.js, KMP, CMP

Cloud & DevOps: AWS (EC2, S3, Lambda, API Gateway), Docker, Vercel, Maven, Git, CI/CD

Databases: PostgreSQL, MySQL, MongoDB, Redis, Pinecone (Vector DB), Redshift

AI & Integration: Claude API, OpenAI API, LangChain, RAG Pipelines, n8n, AI Agents

Tools & Methods: Postman, Selenium, BeautifulSoup, Firebase (FCM), pgAdmin, Agile/Scrum

PROFESSIONAL EXPERIENCE

Software Engineer | **Pluto-Rides** — Bengaluru, India

Jan 2026 – Mar 2026

- ▶ Architected and deployed 30+ serverless REST endpoints on AWS Lambda and API Gateway for ride and driver management, achieving zero-server-overhead scalability and reducing infrastructure cost by 40%
- ▶ Owned end-to-end delivery of a full-featured admin panel covering ride management, driver verification, analytics, and system monitoring — shipping all modules within a 3-month timeline, 100% on schedule
- ▶ Modeled PostgreSQL database schemas for ride matching, driver tracking, and transaction management, supporting 5+ entity relationships and enabling consistent, reliable data flow across all services
- ▶ Built cross-platform mobile applications using Kotlin Multiplatform (KMP) and Compose Multiplatform (CMP), sharing 70% of business logic and UI components across iOS and Android — cutting mobile dev effort in half
- ▶ Added real-time GPS location tracking and Firebase Cloud Messaging (FCM) push notifications for customer and driver apps, boosting time-sensitive ride event response rates by 35%
- ▶ Enforced authentication and authorization flows with role-based access control (RBAC) across 3 user roles (customer, driver, admin), eliminating unauthorized cross-role data access
- ▶ Configured CI/CD pipelines for automated build, test, and deployment workflows, reducing manual release effort and enabling same-day hotfix deployments across environments
- ▶ Collaborated with product and business teams in a 2-week Agile sprint cadence, consistently delivering features on schedule with no critical production incidents

Software Engineer | **Qontact** — Toronto, Canada (Remote)

Jun 2025 – Dec 2025

- ▶ Shipped a RAG-based AI chatbot into a Next.js application using Claude/OpenAI LLM APIs and Pinecone vector database, cutting average support query resolution time by 60% over manual lookup
- ▶ Built and maintained 10+ REST API endpoints using FastAPI to power core business workflows, ensuring reliable data exchange between frontend and backend services with under 200ms average response time
- ▶ Constructed an automated web scraping pipeline using FastAPI, Selenium, and BeautifulSoup to extract and normalize data from 15+ websites into structured JSON schemas, reducing manual data entry time by 80%
- ▶ Delivered a pixel-accurate, responsive web application from scratch using Next.js 15 based on Figma designs, achieving consistent performance across all major browsers and device sizes
- ▶ Utilized AWS S3 for scalable file storage, Redis for high-frequency data caching, and Docker for containerizing services — improving deployment consistency and reducing environment-related bugs by 50%
- ▶ Engineered data transformation pipelines converting raw scraped content into standardized JSON formats, enabling seamless consumption by 3 downstream application services
- ▶ Integrated third-party APIs and webhooks for real-time event handling, extending platform capabilities without increasing backend complexity
- ▶ Participated in weekly code reviews and cross-functional syncs, contributing feedback on 20+ PRs and maintaining code quality standards across the team

PROJECTS

- Modular AI Agent** | *Python, Phidata, OpenAI, Groq, Docker, Pandas*
- Built a production-ready, fully modular AI agent using the Phidata framework with dynamic tool integration and multi-model support (OpenAI, Groq), enabling plug-and-play swapping of AI providers with zero code rewrites
 - Architected a scalable agent pipeline supporting relational and NoSQL database connectivity for real-time querying, with Pandas-powered data manipulation for structured analysis
 - Applied NLP-driven query handling and intelligent automation workflows, enabling natural language inputs to return context-aware, data-grounded responses from connected sources
- Feature Flag API** | *Java 17, Spring Boot 3, PostgreSQL, Redis, Maven*
- Created a production-grade feature flag management API modeled on LaunchDarkly, supporting percentage rollouts, user targeting, and environment-based flag evaluation
 - Leveraged Redis caching to serve flag evaluations at sub-millisecond latency, reducing database read load by 90% under high-frequency evaluation scenarios
- Social Media REST API** | *Java 17, Spring Boot, Spring Security, MySQL, JPA*
- Built a production-grade RESTful backend for a social media platform with full CRUD operations, securing all 9 endpoints using Spring Security with custom exception handling and input validation via Java annotations

EDUCATION

B.Tech — Electronics and Communication Engineering Vellore Institute of Technology (VIT-AP) CGPA: 7.8 / 10.0	Mar 2020 – May 2024
Intermediate (XII) FIITJEE College CGPA: 9.0 / 10.0	Jun 2018 – May 2020
SSC (Class X) FIITJEE School CGPA: 9.5 / 10.0	Jun 2017 – May 2018

CERTIFICATIONS

- Claude AI Fluency: Frameworks and Foundations | Claude 101 — Anthropic
- Data Structures and Algorithms with Java — APNA College
- Spring Boot 3 and Spring Framework 6 with Java — Udemy
- Career Essentials in Software Development — Microsoft & LinkedIn Learning
